Confidential. This report describes security settings for Fabrikam Dental Group; share it only with people who need it.

Summary

We ran 54 security checks and 40 need attention (1 critical, 12 high, 15 medium and 12 low priority). The most urgent: 1 admin without MFA, and 1 whose registration isn't known.

On the positive side, 14 checks passed, including “Between 2 and 4 Global Administrators”, “Automatic forwarding to outside addresses is off” and “Shared mailboxes can't be signed in to”.

Since 13 September, Microsoft Secure Score rose from 31% to 33%, users with MFA rose from 47.8% to 50.9%, 2 issues were fixed and 17 new items came up.

About £164.40 a month (£1,972.80 a year) goes on licences that are unused or assigned to disabled or inactive accounts.

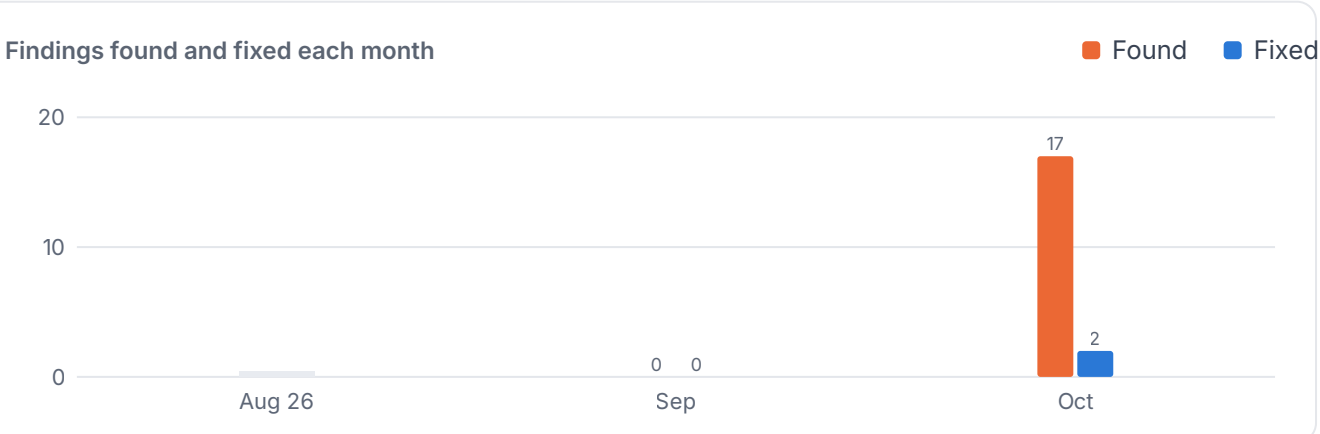

7 checks couldn't run because the data or a licence they need is missing.

Key figures

Secure Score	Users with MFA	Inactive accounts	Licence waste / month
33%	**50.9%**	**7**	**£164.40**
↑ 2 pts since 13 September	↑ 3.1 pts since 13 September		

The last three months

Secure Score rose from 32% to 33% over the quarter. Found counts new findings and ones that came back; fixed counts findings resolved in the month.

Month	Secure Score	Found	Fixed
August 2026	32%	–	–
September 2026	33%	0	0
October 2026	33%	17	2

What was fixed

2 findings fixed between August to October 2026.

FIXED **Every active user has MFA registered** · 2 items: george.walker@fabrikam.example, ella.hughes@fabrikam.example

Projects

1 **Identity and Conditional Access** PROPOSED

Most break-ins start with a stolen password, and admin accounts are the biggest prize. Requiring a second factor everywhere, blocking the old sign-in methods that can't ask for one and locking down admin accounts stops nearly all of them.

8 findings · 54 users

2 **Email security** SUGGESTED

Email is how most attacks arrive and how fraud gets paid. Locking down the domain stops others pretending to be the business, and closing forwarding and old protocols stops mail leaking out.

7 findings · 58 mailboxes

3 **Device management with Intune** SUGGESTED

Company data lives on laptops and phones. Managing them means they're encrypted, kept up to date and can be wiped if lost, and unmanaged devices can be kept away from company data.

5 findings · 57 devices

4 **Windows upgrade and hardware refresh** SUGGESTED

Computers on a Windows version that no longer gets security updates stay open to every flaw found from now on. Upgrading, or replacing machines that can't upgrade, closes that gap.

1 finding · 7 computers

5 **SharePoint storage and archiving** SUGGESTED

When SharePoint storage runs out, people can't save files. Clearing old versions and archiving is usually cheaper than buying more space.

2 findings

18 quick fixes that don't need a project:

- 1 admin without MFA, and 1 whose registration isn't known
- 2 sites with no owner, 2 sites with one owner
- 1 app with access to mail, files or the directory
- 1 domain had sign-in settings changed in the last 30 days
- 1 guest with full control of 1 site
- ...and 13 more

Licence spend

Licences a month	Licences a year	Wasted a month
£896.30	**£10,755.60**	**£164.40** unassigned or on disabled or inactive accounts

Licence	Purchased	Assigned	Each / month	Cost / month	Waste / month
Microsoft 365 Business Premium	46	43	£18.10	£832.60	**£144.80**
Microsoft 365 Business Basic	13	11	£4.90	£63.70	**£19.60**
Total	**59**	**54**		**£896.30**	**£164.40**

Coming up

When	What	Detail
31 Oct 2026 in 20 days	**Visio Plan 2 (suspended)** Subscription	5 licences. Suspended: people can't use it, though admins can still back up its data. Reactivate it before this date or it's deleted.
4 Nov 2026 in 24 days	**aisha.brown@fabrikam.example is nearly full** Mailbox quota	47.2 GB of 49.5 GB (95%). At its current growth it's full around 4 Nov 2026. It stops sending mail when it's full: turn on its archive or clean it up.
Now	**accounts@fabrikam.example is nearly full** Mailbox quota	44.8 GB of 49.5 GB (91%). It stops sending mail when it's full: turn on its archive or clean it up.
Now	**thomas.robinson@fabrikam.example is nearly full** Mailbox quota	45.6 GB of 49.5 GB (92%). It stops sending mail when it's full: turn on its archive or clean it up.
4 Nov 2026 in 24 days	**Board expires** Team or group expiry	Team with 2 members. Anna Kowalski can renew it; otherwise it's deleted, and can be restored for 30 days.
27 Nov 2026 in 47 days	**Project Phoenix expires** Team or group expiry	Team with 3 members. No owner can sign in to renew it; otherwise it's deleted, and can be restored for 30 days.

What we recommend next

1. **Have each listed admin register a strong method**
   1 admin without MFA, and 1 whose registration isn't known.
2. **Make sure each admin is included in an enabled Conditional Access policy that requires MFA for all apps, and isn't excluded from it directly or through a group**
   1 admin not covered by MFA.
3. **Remove admin roles from guest accounts**
   1 guest with admin roles.
4. **Review each app with the client**
   1 app with access to mail, files or the directory.
5. **Turn on BitLocker**
   6 of 54 computers not encrypted.
