Confidential. This report describes security settings for Fabrikam Dental Group; share it only with people who need it.

Summary

We ran 61 security checks and 46 need attention (1 critical, 14 high, 19 medium and 12 low priority). The most urgent: 1 admin without MFA, and 1 whose registration isn't known.

On the positive side, 15 checks passed, including “Between 2 and 4 Global Administrators”, “Automatic forwarding to outside addresses is off” and “Shared mailboxes can't be signed in to”.

Since 14 September, Microsoft Secure Score rose from 31% to 33%, users with MFA rose from 46.2% to 50.9%, 2 issues were fixed and 17 new items came up.

About £164.40 a month (£1,972.80 a year) goes on licences that are unused or assigned to disabled or inactive accounts.

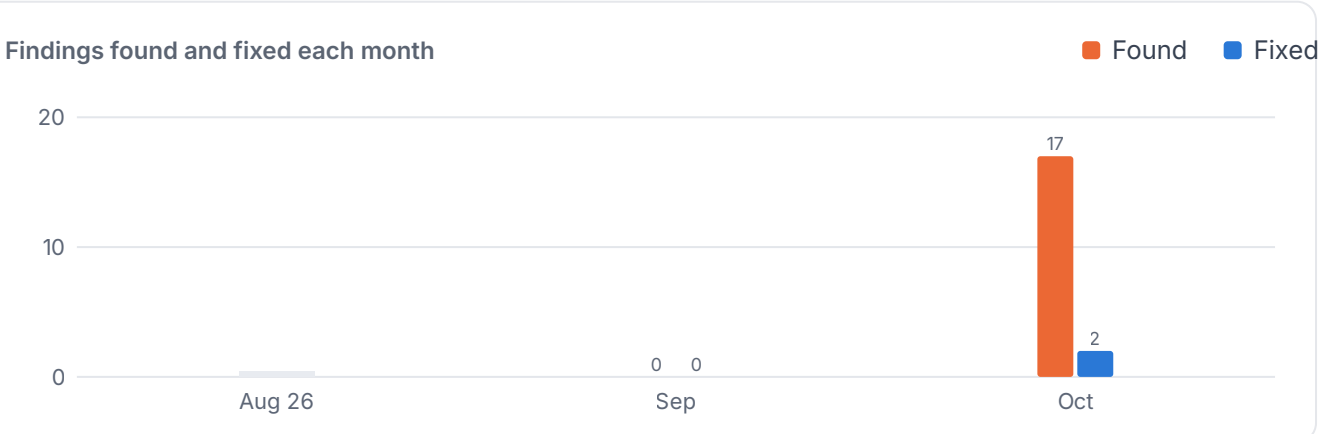

7 checks couldn't run because the data or a licence they need is missing.

Key figures

Secure Score	Users with MFA	Inactive accounts	Licence waste / month
33%	**50.9%**	**7**	**£164.40**
↑ 2 pts since 14 September	↑ 4.7 pts since 14 September		

The last three months

Secure Score rose from 31% to 33% over the quarter. Found counts new findings and ones that came back; fixed counts findings resolved in the month.

Month	Secure Score	Found	Fixed
August 2026	31%	–	–
September 2026	32%	0	0
October 2026	33%	17	2

What was fixed

2 findings fixed between August to October 2026.

FIXED **Every active user has MFA registered** · 2 items: george.walker@fabrikam.example, ella.hughes@fabrikam.example

Projects

1 **Email security** SUGGESTED

Email is how most attacks arrive and how fraud gets paid. Locking down the domain stops others pretending to be the business, and closing forwarding and old protocols stops mail leaking out.

11 findings · 58 mailboxes

2 **Identity and Conditional Access** PROPOSED

Most break-ins start with a stolen password, and admin accounts are the biggest prize. Requiring a second factor everywhere, blocking the old sign-in methods that can't ask for one and locking down admin accounts stops nearly all of them.

8 findings · 55 users

3 **Device management with Intune** SUGGESTED

Company data lives on laptops and phones. Managing them means they're encrypted, kept up to date and can be wiped if lost, and unmanaged devices can be kept away from company data.

7 findings · 57 devices

4 **File sharing and guest access** SUGGESTED

Files shared with anyone who has the link, guests nobody remembers inviting and sites and teams nobody owns are an easy way for data to end up in the wrong hands.

7 findings · 7 sites

5 **Windows upgrade and hardware refresh** SUGGESTED

Computers on a Windows version that no longer gets security updates stay open to every flaw found from now on. Upgrading, or replacing machines that can't upgrade, closes that gap.

1 finding · 7 computers

6 **Storage and archiving** SUGGESTED

When storage runs out, people can't save files or receive email. Clearing old versions and archiving is usually cheaper than buying more space.

2 findings

11 quick fixes that don't need a project:

- 1 admin without MFA, and 1 whose registration isn't known
  Goal: Every admin has MFA registered

- 1 app with access to mail, files or the directory
  Goal: Third-party apps hold only the access they need
- 1 domain had sign-in settings changed in the last 30 days
  Goal: No unexpected changes to how domains sign in
- 7 accounts inactive for 90+ days or never used
  Goal: No inactive accounts
- Users can consent to any app
  Goal: Users can't consent to apps on their own
- ...and 6 more

Licence spend

Licences a month	Licences a year	Wasted a month
£896.30	**£10,755.60**	**£164.40** unassigned or on disabled or inactive accounts

Licence	Purchased	Assigned	Each / month	Cost / month	Waste / month
Microsoft 365 Business Premium	46	43	£18.10	£832.60	**£144.80**
Microsoft 365 Business Basic	13	11	£4.90	£63.70	**£19.60**
Total	**59**	**54**		**£896.30**	**£164.40**

Coming up

When	What	Detail
1 Nov 2026 in 20 days	**Visio Plan 2 (suspended)** Subscription	5 licences. Suspended: people can't use it, though admins can still back up its data. Reactivate it before this date or it's deleted.
5 Nov 2026 in 24 days	**aisha.brown@fabrikam.example is nearly full** Mailbox quota	47.2 GB of 49.5 GB (95%). At its current growth it's full around 5 Nov 2026. It stops sending mail when it's full: turn on its archive or clean it up.
Now	**accounts@fabrikam.example is nearly full** Mailbox quota	44.8 GB of 49.5 GB (91%). It stops sending mail when it's full: turn on its archive or clean it up.
Now	**thomas.robinson@fabrikam.example is nearly full** Mailbox quota	45.6 GB of 49.5 GB (92%). It stops sending mail when it's full: turn on its archive or clean it up.
5 Nov 2026 in 24 days	**Board expires** Team or group expiry	Team with 2 members. Anna Kowalski can renew it; otherwise it's deleted, and can be restored for 30 days.

When	What	Detail
28 Nov 2026 in 47 days	**Project Phoenix expires** Team or group expiry	Team with 3 members. No owner can sign in to renew it; otherwise it's deleted, and can be restored for 30 days.

What we recommend next

1. **Have each listed admin register a strong method**
   1 admin without MFA, and 1 whose registration isn't known.
2. **Make sure each admin is included in an enabled Conditional Access policy that requires MFA for all apps, and isn't excluded from it directly or through a group**
   1 admin not covered by MFA.
3. **Remove admin roles from guest accounts**
   1 guest with admin roles.
4. **Review each app with the client**
   1 app with access to mail, files or the directory.
5. **Turn on BitLocker**
   6 of 54 computers not encrypted.
